EXPERIENCE

AnalystLab Africa

Jun. 2026 – Aug. 2026

Data Analytics Intern

Remote

- Worked on multiple real-world analytics projects spanning financial markets, direct marketing, e-commerce, and streaming platform datasets.
- Performed data cleaning, validation, exploratory data analysis, visualization, feature engineering, and statistical analysis using Python and its data science ecosystem.
- Translated analytical findings into actionable business recommendations through technical reports, dashboards, and data storytelling.

Spark Academy

Mar. 2025 – Dec. 2025

Machine Learning Researcher

Lagos, Nigeria

- Preprocessed and curated medical image datasets, including normalization, resizing, augmentation, and labeling to improve model performance.
- Designed, trained, and fine-tuned convolutional neural networks for tasks such as disease detection (glioblastoma), classification, and image segmentation.
- Evaluated model performance using medical-relevant metrics such as accuracy, precision, recall, and dice score.

PROJECTS

HealthPilot AI: LLM-Powered Clinical Data Assistant

Personal Project

- Developed an AI assistant that converts clinicians' natural language questions into SQL queries for real-time access to healthcare data.
- Built an end-to-end Retrieval-to-SQL pipeline integrating a Large Language Model with a MySQL database to execute queries and return concise clinical summaries.
- Implemented automated data visualization to present query results as intuitive charts, improving accessibility for non-technical healthcare professionals.

Diabetes Risk Prediction Model

Healthcare Competition

- Built classification pipelines to predict diabetes risk using clinical datasets.
- Focused on probabilistic prediction and healthcare-oriented evaluation techniques for reliable risk assessment.

Brain Tumor Image Segmentation System

Spark Academy

- Engineered preprocessing pipelines for complex neuroimaging data and implemented CNN-based architectures for segmentation.
- Optimized performance using metrics including Dice Score, Precision, and Recall.

EDUCATION

University of Lagos

03/2026

Bachelor of Medicine, Bachelor of Surgery (MBBS)

Lagos, Nigeria

WorldQuant University

05/2025

Applied Data Science

Online

SKILLS

Languages : Python, SQL

Technologies & Tools : pandas, numpy, scikit-learn, PyTorch, Tableau, Git, Docker, Postgresql, Ai
